

IB Conference on Biomembranes

Friday, October 19, 2007

Venue: APS-vergadercentrum, Delta conference room
Zwarte Woud 2, 3524 SJ Utrecht, The Netherlands

- 9.15** **Arrivals, Coffee & Tea**
- 9.55** **Opening by IB Director**
- 10.00** **Markus Aebi** (host I. Braakman)
ETH, Zürich, Switzerland
"N-linked protein glycosylation – and some ideas about lipid asymmetry of membranes"
- 10.45** **Bart De Strooper** (host G. van Meer)
KULeuven and Flanders Interuniversity Institute for Biotechnology, Centre for Human Genetics, Leuven, Belgium
"Proteolytic activity in the hydrophobic environment of the membrane: role of intramembrane proteolysis in apoptosis and Alzheimer's Disease"
- 11.30** **Marcio Rodrigues** (host H. de Cock)
Instituto de Microbiologia Professor Paulo de Góes, Universidade Federal do Rio de Janeiro, Rio de Janeiro, Brazil
"Secretory vesicles in the fungal pathogen Cryptococcus neoformans"
- 12.15** **Lunch**
- 13.15** **Vivek Malhotra** (host B. Helms)
Department of Cell and Developmental Biology, University of California San Diego, CA, USA
"Mechanism of conventional and unconventional protein secretion"
- 14.00** **Anton Horrevoets** (host F. de Groot)
Department of Medical Biochemistry, AMC, Amsterdam, The Netherlands
"Blood vessel functional genomics: from database to knowledgebase"
- 14.45** **Vassilis Koronakis** (host J. Tommassen)
Department of Pathology, University of Cambridge, Cambridge, UK
"Export, efflux, subversion—how do pathogenic bacteria do it?"
- 15.30** **Coffee & Tea**
- 16.00** **2007 van Deenen medallist**
Randy Schekman (host J. Klumperman)
Howard Hughes Medical Institute and Department of Molecular and Cell Biology, University of California at Berkeley, Berkeley, CA, USA
"Transport vesicle biogenesis: Mechanism and disease connections"
- 16.45-18.00** **Closing & Drinks**
